**October 2017 - - 1823/2 & 1827
Quarters Offered**

October 14, 2017

Outstanding News

I am thrilled to announce that I am now offering an 1823/2 quarter and an 1827 Original quarter! Both have the ultimate pedigree - - Eliasberg! The 1823/2 quarter is a PCGS VG-8 and is #18 in Steve Tompkins' excellent book, "*Early United States Quarters 1796 - 1838*".

The 1827 Original quarter is the **ONLY CIRCULATED EXAMPLE** of this rare Federal issue which has only **NINE** known coins. The 1827 will be auctioned. The auction rules are included in the website description of the coin, but the salient points are: Minimum bid is \$110,000. Minimum bid increment is \$2,000. All bids must be in whole thousands, bids not in whole thousands will be reduced to the nearest whole thousand. All bids must be communicated to me by either email or phone and subsequently confirmed by email. I will post the **SECOND HIGHEST BID** on the website. Bidding will start on October 12 and will end at 5 pm Eastern time on Saturday, November 4, 2017. There is **NO BUYER'S FEE** and **PAYMENT MUST BE COMPLETED BY DECEMBER 1, 2017.**

Thank you to researchers Steve Tompkins and Karl Moulton for their research into the pedigrees for the 1823/2 and 1827 Original quarters, reprinted with permission.

And, now for the Newps

Obviously, our two best newps are the 1823/2 quarter and the 1827 Original quarter. However, we also have some other great newps, including business strike half dimes of 1864, 1865 (3 coins), and 1867; business strike dimes of 1863, 1864 (2 coins), 1866 and 1867, an 1818 B-9 quarter with the arrows clash, an 1825 B-3 quarter with the late die state of the cud, Seated quarters of 1852-O, 1853 No Arrows, and 1860-S; half dollars of 1802, 1841-O baseball reverse, 1842 small date with cud at TAT, 1865 doubled date, and 1887. How about that!

Probable Scam - - Don't Fall For This One

The other day I received an email entitled "For Your Information" addressed to "Numismatic Dealers". The text of the email stated "Please find attachment for your reference. Regards." It wasn't signed by anyone and it was sent from a secured (i.e., hidden) address.

In summary, this is an email I'm not expecting, issued by someone with a secret identity, unsigned, with an unknown attachment. My guess is that the "attachment" takes over your computer or gives it a virus, and you have to pay some ransom in order to get your computer back. Readers, please don't fall for this kind of probable scam!
